The truth is, Mr. Waller was not defraited because he was a negro. On the contrary, he got more votes by being black than he would otherwise have received. Had he been the same man in every respect, except being white, he would not have not perf, except being white, he would not have not opposition in his contest have polled half the votes he did.—Troy

Say, Sol, that is real cruel of you. Mr. smart is downright mean.

ing paper for its account of the Resulmis-sion convention at Wichita. What does this mean! "says the Kansas City Star. It probably means that while the conven-tions were in session joint whisky was ta-boord and a big supply of the oldest Kentucky brands was at hand. Ordinarily Wighits has but little of the "Very Best of

Your conclusion is entirely wrong, as good form, not only, but also in the "very best spirits" - and never loses her

At one time Wichita was the largest inland grain market in the world. She excellence, but the dual political event From the Atchison Champton lost this prestige and the accruing benefits by not preparing to accommodate it with sufficient and necessary storage fathe stakes raked in.

It is painful to see such strict-construction party organs as the Lawrence Journal-Tribune and the Topeka Capital quarrolling over the "methods" employed in controlling the actions of the late Topeka convention. The Journal says the said methods were not good, and the Capital retorts by saying that everything was done according to Hoyle, or words to that effect. Fil. fie, brethren; you quarreling over the "methods" employed to that effect. Fil, fie, brethren; you oughtn't to be telling tales out of school oughtn't to be telling tales out of school that way. Doncher knew you are putting a club in the enemy's hand. And is as good as elected to-day, having received a triple nomination (Alliance, Democracy to the Leavenger). then, the Leavenworth Times; it had to help the thing along by publishing all that both the others said. Pshaw!

The senate passed the tariff bill as re constructed by it, by a strict party vote. Senator Plumb did not vote with the Democrats against the bill on its final passage; but a moment's reflection will suggest a very plausible explanation: Mr. Plumb labored zealously to improve the bill as it came from the house, and though he faired in part, he succeeded in part, and to the extent of making the measure an improvement over the present law. That being the case he performed a service to the country-leaving his party out of the question-in voting his party out of the question—in voting tonnage passed through the Detroit river for the measure that he had so mate—to the amount of 19,000,000 tons more rially aided in formulating. We will than the entries and clearances of all th add, by the way, that Mr. Plumb or Mr. Paddock ought to have been put upon the senate conference committee and not

THAT TIN TAX AGAIN.

The Wichita Eagle says that the claim that the tariff on tin will increase the wages of tin miners is "all bosh." The Eagle doesn't believe then that two jobs are better than one for the laboring man. The tariff would greatly increase the demand for American tin. It would not only increase the wages of these miners but it would give employment to hundreds more. If this is not true then the whole theory of protection is false.—Leavenworth Times.

In this case the EAGLE certainly does not believe that the "two jobs" are better than one for the laboring man. No tariff rate that could be placed on tin would have the effect of increasing the production of tin in this country, for the simple reason that the only tin known to exist in the United States is in the Dakota mine and that is controlled and is being worked to the fullest capacity by the English syndicate that first developed it. and as heretofore stated, this has all been done without any bonus in the shape of tariff, and would be continued if no tariff were imposed. In point of fact, it is a monopoly, and that fact affords it all the "protection" it needs. The claim that the imposition of a tariff duty will an organ have the effect of giving more men employment and an increase of wages, we again say is all bosh, and the Times' statement to the contrary is a mere assertion without any foundation of fact to base it upon. can not dealers in a hundred other The assertion of the Times that "if this is not true, then the whole theory of protection is false," is another mere gratuity. It may apply as a general rule, but One thing is absolutely certain, that the personnel of the candidates placed in non-ination by the Democratic state convention will not bear any comparison with those tion, for the reason tailed. The property will not bear any comparison with those to be the production of the produ posed tariff will not induce the produc- all its coaches red. tion of a single additional pound of tin and will not increase the wages of American labor a single penny; but, as Mr.

GOVERNOR CHARLES ROBINSON.

The nomination of ex-Governor Charles it to recover, and now it shows up after Robinson for governor on the Demo-this fashion: nominations ever made during its entire history in Kansas. While not agreeing with Governor Robinson politically, the Champion, as an act of common justice, eels moved to say that his nomination

s a strong one. Of Governor Robinson's political career in Kansas, it is, perhaps, unnecessary to speak at length to Kansans. Coming to Kansas originally from Massachusetts as a free state man, Governor Robinson early identified himself with the great ditical movement which resulted in making Kansas a free state. His prommence in the politics of that period coupled with his personal character and bility, resulted in his selection as first governor of the new state he did so

His administration as governor was a editable and honorable one. For years, until about six years ago, Gevernor Robnson affiliated with the Republi party and was both prominent and influ-ential in its councils. Differing with the Republican party chiefly on the question of prohibition, about the time ferred to, he ceased practically to be a Republican and became independent in

Whatever may be Governor Robinson's personal and political idiocycrases, this much may be said of him—he is a man of decided ability, of unblemished haracter, of spotless life.

The Democratic party is to be congratulated upon the wisdom shown in this cadidate of the Resubmission and Demo-cra ic parties, Governor Robinson may afely count upon polling the strength of both these organizations, whatever

The Champion, while conceding Gov-ernor Robinson's selection by both par-ties os good politics on their part, sees in it no special cause for apprehension on the part of the Republicans

THE ISSUE MADE.

from the Lawrence Journal-Tailbune. The action of the two conventions at Wichita yesterday makes the issue Kansas for the coming campaign. course the Republicans always have to contend against the Democrats, that party having no legitimate mission on earth except to fight whatever the Republicans advocate. But now an issue a were in the minority instead of having a

little different is presented. Let us see what it is and what is its extent.

From the beginning the Democratic party has opposed every good thing that has ever been advocated by the Republicans. But in this instance it is not merely for the love of opposing or doing the wrong thing that it is making the fight. The old saying that "whisky makes Demo-crats" has become a part of the creed of the party, and they fear that should whisky be banished from the country it means the eternal death of Democracy. And so it would. Recognizing this fact the Democratic party of Kansas fortifies itself behind the saloon and attacks the Republican party. It attacks that which is a part of the fundamental law of the state, that which for nearly ten years has withstood the attacks of foreign and domestic foes, that which in the face of every discouragment has been a success and which has done more for Kansas than any other law that was ever en-acted. The Democratic party demands that the state recede from the position it holds, the proudest place in the list of states, and place itself upon the level of Missouri. And upon that demand they go before the people and ask for support. For the standard bearer the party has a man who spent the best years of his manhood in earnest, honest, patriotic,

noble work for his state and his country. A man who has been many times honor ed by the state and the nation, but who has allowed his hatred of prohibition and his love for office to overbalance all other considerations. For their allies the Democrats have those Republicans who think more of whisky than they do of their party. Who would see the Republican party wrecked

if they could build a saloon upon its ruins. To these men, who are but few. the Democrats look for assistance. And they will not look in vain. The unholy ct made at Wichita will be carried out to the letter.

Then again: The Democrats rely upon the Alliance or "Peoples" ticket to take from the Republicans thousands of votes in the state. To that end the Alliance is receiving every encouragement from the Democrats and their allies. The party knows full well that when the test co the Democrats who belong to the Alli-ance will come back to the fold and vote the Bourbon ticket without a scratch, while they hope to keep the Republican Alliance men out of the ranks of their old party and thus, while they can not get the vote for democracy it will not go

And then again we have another foe youd the limits of the empire state of it is suggested that George Martin try a that promises to aid the Democratic party with all its strength, and while it has but little power and few votes, yet all the votes and power that it has will be used to defeat the Republican party. We refer to the Prohibitionists. Of the 3,000 or 4,000 votes that will prohably be cast in the state for that party there will not be to exceed 100 that would not otherwise be cast for the Republican ticket. To them also the Democrats look, and what little aid the unnatural and parri-cidal party is able to render will be

And thus we have the situation. The the very strongest opponent the can be long twine on the free list. But what does Republicans must battle against foss the very strongest opponent the can be long twine on the free list. But what does Republicans must battle against foss without and foss within. It must endure stabs from those who by every natural and political tie should be fight more than popular, he will be unable to years old. Lats of the men who will take ing in the ranks. But the party in Kansus is able to battle against all these fearful odds and still come out victorious. The true men of Kansas have something to fight for this year besides political honor and pride. They must protect their homes and the honor of their state. And they will do their duty. When the votes are counted in next November Kansas wiil be found to be true to her traditions and true to herself.

EXCHANGE SHOTS.

Not Conceded, Because Not True. From the Kansas City Gazette.

All must concede that prohibition has me nearer prohibiting in Kansas than The general opinion is that in spite of intidel. But that is not an issue in this regulation ever come to regulating any Whisky is an outlaw, not to be

Aspersing Tomlinson.

If the Wichita convention demonstrated one thing more clearly than another, it was that the Democratic party of Kan as demands the renomination of Mr. Cleveland. It is true that Tomlin "ferninst" him, but that can be fixed.

Anticipated Them.

A delegate to one of the conventions at Wichita was struck as soon as he got off the train by a sign reading: "A Pair of Jacks at the opera house tonight." He slowly wiped his spectacles with his bandana and said to his companion: Say, Jim, the blasted fools have got together before we got here."

From the Sanday Mirr "Vic." Murdock did the opening of the Oklahoma legislature for the EAGLE, and right well did he cover the subject, His reports were sufficiently exhaustive without being loaded with unnecesary or meaningless verbesity and his forecasts of the situation were generally correct.

La Grippe Billed for 1890-91.

From reposts of the medical it is probable that la grippe will appear it is a few weeks. There n the city again in a few weeks. have been several cases reported and it is presumed by a number of reputable physicians that the trying and in many ses fatal disease will be prevalent before winter opens.

Amounts to the Same Thing.

From the Emporia Republican Colonel Murdock declares there "anti-Resubmission plank" in the Repub-lican platform. Perhaps not. But there is a strong prohibition plank, and a marked absence of the Resubmission plank which Senator Bentley labored so many hours to work in; which amounts to the same thing.

Minneapolis Has the Idea

Now the Republicans have done it and both Republican and Democratic county tickets have been named. The voter can take his choice. The county has certain business to be done. The im-pertant thing is to get good men to do it. The matter of supreme importance is to support for an office of such a grade the most reliable and capable candidate.

Serious Charges if True,

The Republican members of the Alliance are anxious to demonstrate the fact that they will not support a candidate for governor, even though he be a citizen of their own county, who is of such questionable character as J. F. Willits, a man who has attempted to place his property out of the reach of his creditors, even to the defrauding of the widow.

majority of 82,000. On the 20th inst. the campaign will open up all over the state and the camp fires will be kept burning till the day of election. Kansas Republicans may not always be right, but they are always ready to meet their

A Critical Commentary.

Kansas Republicans have a happy fac-ulty of adapting themselves to circum stances. The recent Topeka convention indorsed President Harrison's administration in one resolution and in the next commended Senators Plumb and Ingalls for the course they had taken in the tariff matter, catching a short breath sufficiently to come out strong for the "prin-ciple of protection as expounded by James G. Blaine."

Explains it, to a Dot.

rom the Albany Journal While discussing the fact of many mortgage foreclosures in Kansas and other states, it is well to bear in mind that many of these are upon the unoccupied lands that have been bought for speculative purposes and have quently been mortgaged for all they will bring. The farmer is by no means the victim of the majority of these foreclosures. It is the speculator who has failed to realize.

But Will They?

From the Lawrence Journa The resubmissionists in convention as sembled in Wichita vesterday discounted even their allies, the Democrats. In their resolutions they "arraigned," they "charged," they "deplored," they "op-posed," they "denounced," and then they went over to the Democrats and endorsed everything that had been done by the mossbacks, and agreed to assist the latter in attempting to defeat the Republi-can party. After the delegates get over the headaches they contracted while rati-fying the nominations they will nearly

all be heartily ashamed of themselves. Asks a Leading Question

From a report of the condition of Har-per County Alliance association, pub-lished in the Bulletin of August 12, 1890. we notice that they declare a dividend of 28 4-5 per cent, for the last three months. This is equal to 115 1-5 per cent. per annum, or \$115.20 on an investment of \$100. Now what we would like to know is whether this is done for the purpose of catching suckers or are they robbing the farmers in this kind of style.

As she gave up hope she was caught around the valst and lifted in front of a man on horseback, who in a few minutes had her in Her horse had reached the road, and after she was reated her rescuer brought it to her and helped her mount.

For the first time she noticed him. He vas fully six feet tall and broad shouldered. He wore a full beard and while very rough looking was very handsome. She ardly spoke a word, yet did not seem em- hours a day. He fives in Ha

Evils of Civilization. Civilization abounds in artificial, abnorome extent the same thing is true of the ower animals, and even of vegetables. The demesticated horse is far more delicate than his wild progenitor, and the wild potato probably has no such tendency to Ariament ot as is manifested by its cultivated pro-

Modern civilization makes all the na tions neighbors sharmer not only of each other's blessings, but of each other's vices and discuses. Yellow fover dengue olera, typhus fever and la grippe all reach us from abroad.

Meantime the progress of the United States as a nation is not without its bad side. Young men abandon the quiet and invigorating life of the farm for the exect ing and in some respects demoralizing and enfeebling life of the city. The young women leave the normal and healthful work of the home for the exhausting toll of the shop and the beggariy life of the boarding house.-Youth's Companion.

Human Body Insensitive to Magnetices. The most careful experiments have Mrs. Marshal Grimes sends the Eagus shown says a medical authority, that the a picture of her bushand with his hair and mustache and the end of his howe retouched in red ink. It is an improvement, at least, Mrs. Grimes ought to mag stand between the poles of the strong may stand between the poles of the strong may stand between the poles of the strong est magnet, one of which might hold up a ton of iron, without the slightest perceptible effects upon any of the bodily function

GEOLOGICAL SURVEY WORK. Extremely Slow and Complicated Meth-

ous of the Surveyors. For two sensons now the United States dogical survey has been at work Maine, having gone over most of York, Its task is the making of accurate topographic maps of this region, which, when

completed, are to be used by the geologista. As this bureau of the government has been organized but ten years the scope of the work is not understood by many people. The chief feature of these maps is their eccuracy-nothing is done by guesswork. They also, besides giving the exact-lines of roads, rivers and sea coast, show the elevation of the land above the sea at all points. The scale is a trifle less than one and a half inches to a mile, or in other words the area is really 45,000 times longer than the map shows it. The government cares little about state, county or town boundaries, and instead of these the lines used are the meridians and parallels. Each map is bounded on two sides by 15 min. of latitude, and on the other two by 15 min.

At the latitude of Maine one of these 13 min, sheets is about seventeen unles long, while the width of the area from east to west is about thirteen miles. This gives an area of 221 square miles, which decreases very slowly as we go northward. Each sheet is named from the most prominent town or body of water falling w from the wildest parts of the wild west tells a good story on herself that goes to Maine are York, Berwick, Kennebunk, Buideford, Newfield, Buxton, Pertland, ing about not judging by appearances. She | Casco bay, Freeport and Bath sheets. The Augusta sheet embraces parts of the towns

The contents of these maps are shown by saw a cloud from which a heavy rain was various colors. The roads and houses and ward her by the wind she turned and put her horse in a gallon. The bed of the river was hard and sandy and her horse skins in bine. The contour lines are traced in med along as if thoroughly enjoying the brown. The distribution of forests is noted As she turned a bend she looked back in exsenting the Lid work, and when this feature is added to the map, as it is in spe-

shows one where to look for the woods As to the contour lines, which to one who knows how to read them tell at a glance the following explanation is given: Detach have in the remaining concentric curved lines a very fair idea of hew a bill is represented by contours. Supposing the map is that of a small island running up to a considerable height. The outside cobweb represents the shore line, which of course is

always at the same elevation. hill on the island till you reselve height of twenty feet. Then woth around the island, always keeping at the assus elevation, When you get back to the starting point you have traced'ou the ground a contour Twenty miles higher, another walk would trace out a third one, and so on, By counting the lines from the sea level and noticing their distance sport-one can tell and if the latter, how steen the hills are. To make these maps is show work, fifty square miles a month being very good progress for one man in hilly New Mngland. The winters are spent in Washington, where the maps are finally drawn in ink, and then handed over to the engravers.-W. H. Beamas in Portland Express.

A Noted Physician.

Sir Morell McKeurfe, Queen Victoria's physician, is one of the busiest men in Lonthanked him for saving her life, but he don, and works on an average fourteen barrassed. When they reached home she | Cavendials square, a thoroughfare given spoke to her sister in French and said. "Is over to the medical profession, for out of he not handsome?
